Plate 6.--Telluric anomaly map at 10-60 second periods. Contoured in K valdes; dashed where approximate. Solid circles are measurement locations. Triangles are heat flow holes and values are in heat flow units (HFU) where 1 HFU equals 1 cal x 10^{-6}/cm^2/sec. Heat flow data courtesy of Jim Combs, University of Texas at Dallas, written communication, 1976.
