

Figure 58.—Neutron log of drill-hole B-D17

Hole location: 1,050 ft FWL, 1,950 ft FSL,
sec. 3, T. 14 N., R. 90 W.,
6th P.M., Carbon County, Wyo.

Logged depth: 649 ft

Detector type: Scintillation

Collar elevation: 7,220 ft

Time constant: 4 sec

Date drilled: Aug. 26-31, 1976

Source type: Americium-beryllium

Drill-bit size: 5-1/8 in

Source size: 3 curies

Drilling medium: Air and water

Source-to-detector spacing: 16 in

Total depth: 650 ft

Logging speed: 17 ft/min

Water level: 36.5 ft

Calibration: See log

Logged by: R. A. McCullough

Logger unit: Well Reconnaissance W-236265

Date logged: Aug. 31, 1976
