EXPLANATION

Magnetic contours

Showing residual magnetic anomalies in total magnetic intensity relative to the reference field of the World Chart of the Earth's Magnetic Field published by the Defense Mapping Agency, Washington, D.C. Hashured to indicate areas of lower magnetic intensity. Contour intervals are 10, 50, and 100 gammas
Flight paths are indicated by ticks on magnetic contours along the path
Location of magnetic high or low value along flight path is indicated by a dot
