EXPLANATION

PROJECTION OF NORTHEAST EDGE OF CORCORAN CLAY MEMBER OF THE TULARE FORMATION

CONTOUR OF WATER SURFACE IN INTERMEDIATE AQUIFER—Shows altitude of water surface in intermediate aquifer. Queried where data are inconclusive. Contour interval 10 feet

POTENIOMETRIC CONTOUR—Shows altitude at which water level would have stood in tightly cased wells in confined aquifer. Queried where data are inconclusive. Contour interval 10 feet

SUPPLEMENTAL CONTOUR—Queried where data are inconclusive. Contour interval 5 feet

IRRIGATION SUPPLY WELL, NUMBER, AND ALTITUDE OF WATER SURFACE IN INTERMEDIATE AQUIFER—Shows well number, 4P1, and altitude of water surface, 136 feet

IRRIGATION SUPPLY WELL, NUMBER, AND ALTITUDE OF POTENIOMETRIC SURFACE IN CONFINED AQUIFER—Shows well number, 19H1, and altitude of potentiometric surface, 136 feet

ALTITUDE OF WATER SURFACE IN THE INTERMEDIATE AQUIFER AND OF POTENIOMETRIC SURFACE IN THE CONFINED AQUIFER, SEPTEMBER 1975, MERCEDE, CALIF., AND VICINITY

Contouring by R. W. Page, 1976
