GEOLOGY OF THE MONTEREY BAY REGION, CALIFORNIA

GEOLOGY OF MONTEREY BAY REGION, CALIFORNIA
STRUCTURE SECTIONS

Sources of Information Used For Compilation of Structure Sections

Offshore segments were constructed from interpretation of marine seismic reflection profiles and information from sea floor rock samples. Onshore segments were compiled from Hickey (1968), Muir (1972), and Clark and Rietman (1973). Symbols for rock units are the same as those shown on the geologic map (Plate 3).

This report is preliminary and has not been edited or reviewed for conformity with Geological Survey standards and nomenclature.
