

Figure 7C

Editors + Illustrators: Fig 7 A-E = 5 page-size maps (all two-page illustrations)

ATB should be on facing pages; Flagstaff Publications Division group has
1:1 continuous trans w/ respect of the base - with base crumpeque that this
overlay fits. Transverse + stichous etc are to be reproduced
from Wolfe's crumpeque base - NOT FROM THIS OVERLAY !!

Craters are outlined on ovality for easy identification - They are to be labeled but not outlined in final illustration. Use ovality as a guide for names, solid vs dashed traverse path, and for symbol type ($\odot$, $\triangle$, $\square$). A major purpose for this illustration is to display the high detail of the photos. Please use the finest possible screen.
