IDENTIFIED AND HYPOTHETICAL RESOURCES--Showing totals for Reserve Base (RB) and, in areas suitable for surface mining, Reserves (R), in millions of short tons by section. Dash indicates no resources in that category.
Reserve Base (RB) x Recovery Factor (85%) = Reserves (R)

Recovery factors have not been established for underground development of the coal in this quadrangle. Therefore, Reserves(R) were not calculated in areas where the overburden thickness exceeds 200 feet.
