BASE FROM U.S. GEOLOGICAL SURVEY, 1970

COMPILED IN 1978

COAL RESOURCE OCCURRENCE MAP OF THE DUNN CENTER NW QUADRANGLE,  
DUNN COUNTY, NORTH DAKOTA  
BY  
WOODWARD-CLYDE CONSULTANTS  
1978

EXPLANATION

NON-FEDERAL COAL LAND--Land for which the Federal Government does not own the coal rights.

LIMIT OF RESERVE BASE COAL--5 foot coal isopach line. Arrow points toward reserve base coal.

200 FOOT OVERBURDEN ISOPACH--Used as boundary for surface mining. Arrows point toward area suitable for surface mining.

BOUNDARY LINES--Showing areas of measured, indicated, inferred, and hypothetical coal resources. Dashed where projected from adjacent quadrangles.

	RB	R(85%)	
	4.8	4.1	(Measured resources)
	42.4	36.0	(Indicated resources)
	65.5	55.7	(Inferred resources)
HYP	1.3		(Hypothetical resources)

IDENTIFIED AND HYPOTHETICAL RESOURCES--Showing totals for Reserve Base (RB) and, in areas suitable for surface mining, Reserves (R), in millions of short tons by section. Dash indicates no resources in that category. Reserve Base (RB) x Recovery Factor (85%) = Reserves (R).

Recovery factors have not been established for underground development of the coal in this quadrangle. Therefore, Reserves (R) were not calculated in areas where the overburden thickness exceeds 200 feet.

To convert feet to meters, multiply feet by 0.3048

To convert short tons to metric tons, multiply short tons by 0.9072.
