

EXPLANATION

NON-FEDERAL COAL LAND

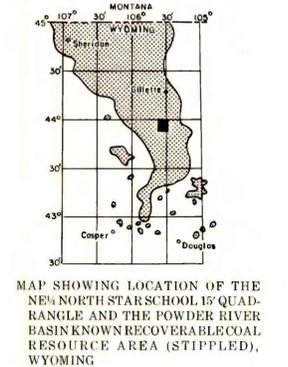

TRACE OF COAL BED OUTCROP—Arrow points toward the coal-bearing area. "V" symbol indicates baked rock with dotted line showing limit of burning. Coal bed dashed where inferred.

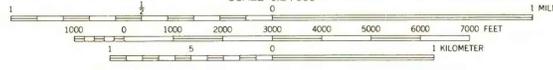

This outcrop mapping is derived and enlarged from 1:126,720 scale publications from Wegemann and others (1928, p. 1-14) and Dobbin and others (1928). Numerous irregularities in outcrop elevations and the areal geology-topographic map relationship emphasize that this map presents a generalized configuration of the coal bed outcrop. Horizontal accuracy of outcrop location is estimated at ± 1000 feet (305 m).

BOUNDARY LINES—Enclosing areas of measured, indicated and inferred coal resources of the coal bed. Dashed where projected from adjacent quadrangles. Hypothetical resources beyond 3 miles.

To convert miles to kilometers multiply miles by 1.609.

Base from U.S. Geological Survey, 1959. SCALE 1:24,000. Compiled in 1979.

This report has not been edited for conformity with U.S. Geological Survey editorial standards or stratigraphic nomenclature.
