

EXPLANATION

NON-FEDERAL COAL LAND-Coal tonnages not evaluated.

RB	R(95%)	(Measured)
1.20	1.14	(Indicated)
0.86	0.82	(Inferred)
12.00	11.40	(Inferred)

IDENTIFIED RESOURCES OF COAL BED- In millions of short tons. Dash indicates no resources in that category. Reserve Base (RB) x the recovery factor (95%) = Reserves (R).

TRACE OF COAL BED OUTCROP-Arrow points toward the coal-bearing area. "V" symbol indicates baked rock with dotted line showing limit of burning. Coal bed dashed where inferred.

To convert short tons to metric tons multiply short tons by 0.9072.

This outcrop mapping is derived and enlarged from a 1:126,720 scale publication from Kiegemann and others (1928, p. 1-14). Numerous irregularities in outcrop elevations and the areal geology-topographic map relationship emphasize that this map presents a generalized configuration of the coal bed outcrop. Horizontal accuracy of outcrop location is estimated at + 1000 feet (305 m).
