COOK CREEK RESERVOIR QUADRANGLE
 MONTANA
 7.5 MINUTE SERIES (TOPOGRAPHIC)

EXPLANATION

400
 OVERBURDEN ISOPACH—Showing thickness of overburden, in feet, from the surface to the top of the coal bed. The 200-foot isopach is omitted where it is too close to a mining-ratio contour for map readability. Isopach interval 200 feet (61 m) with an intermediate 500-foot isopach.

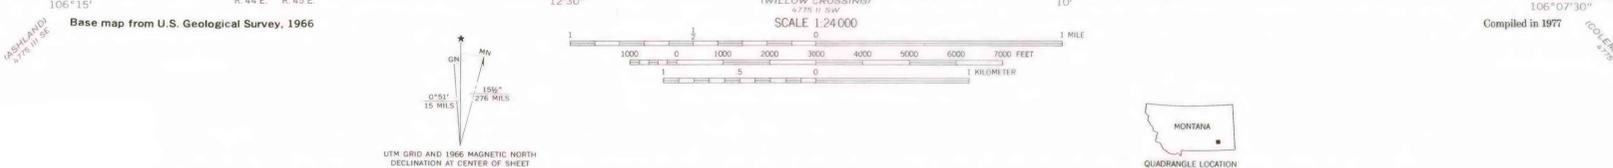

B
 BOUNDARY OF COAL 5 FEET OR MORE THICK—
 Drawn along the outcrop of coal bed and/or the inferred contact between burned and unburned coal and/or the 5-foot coal isopach. Arrows point toward area of coal 5 feet or more thick.

152
 DRILL HOLE—Showing thickness of overburden, in feet, from the surface to the top of the coal bed.

10
 MINING-RATIO CONTOUR—Number indicates cubic yards of overburden per ton of recoverable coal by surface-mining methods. Contours shown only in areas suitable for surface mining within the stripping limit.

To convert feet to meters, multiply feet by 0.3048.

To convert yds³/ton to m³/metric ton, multiply yds³/ton by 0.842.
