

EXPLANATION

ISOPACHS—Showing thickness of coal, in feet. Dash where inferred. Isopach interval 1 foot.

STRUCTURE CONTOURS—Drawn on top of coal bed. Solid where vertical accuracy within 200 feet; long dashed where vertical accuracy possibly not within 200 feet; short dashed where projected above land surface. Contour interval is 400 feet (121.9m). Datum is mean sea level.

TRACE OF COAL BED OUTCROP—Showing symbol of name of coal bed. Arrow points toward coal-bearing area.

DRILL HOLE—Showing thickness of coal, in feet, or showing altitude of top of coal bed, in feet. Drill holes which do not intersect the coal or from which a coal thickness could not be determined are not shown.

POINT OF MEASUREMENT—Showing thickness of coal, in feet. Includes all points of measurement other than drill holes.

INSUFFICIENT DATA LINE—Coal thickness cannot be determined beyond line shown because of insufficient data.

To convert feet to meters, multiply feet by 0.3048
