

EXPLANATION

NON-FEDERAL COAL LAND—Land for which the Federal Government does not own the coal rights, and for which the coal-development potential is not rated.

AREA OF HIGH-DEVELOPMENT POTENTIAL—Area contains coal in beds 5 feet (1.5m) or more thick between depths of 200 feet (61.0m) and 1,000 feet (304.8m) below the surface and where the dip is 15 degrees or less.

AREA OF LOW COAL-DEVELOPMENT POTENTIAL—Area contains coal in beds 5 feet (1.5m) or more thick at depths ranging from 200 to 3,000 ft (61.0 to 914.4m) below the surface and where the dip is greater than 15 degrees.

AREA OF UNKNOWN COAL-DEVELOPMENT POTENTIAL—Area contains no known coal in beds 5 feet (1.5m) or more thick, but coal-bearing units are present in area at depths between 200 feet (61.0m) and 3,000 feet (914.4m) below the surface.

AREA OF NO COAL-DEVELOPMENT POTENTIAL—No coal beds are known to occur in area; or coal beds are present in area at depths greater than 3,000 feet (914.4m) below the surface.

To convert feet to meters, multiply feet by 0.3048
