

STRUCTURE CONTOURS—Drawn on top of coal bed. Solid where vertical accuracy within 40 feet; dashed where vertical accuracy possibly not within 40 feet. Contour interval is 80 feet (24m). Datum is mean sea level.

DRILL HOLE—Showing altitude of top of coal bed, in feet. Drill holes which did not intersect top of coal bed or from which bed altitude could not be determined, are not shown.

TRACE OF COAL BED OUTCROP—Showing symbol of name of coal bed. Arrow points toward coal-bearing area. Dashed where inferred.

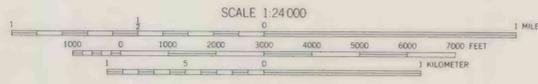

INSUFFICIENT DATA LINE—Coal resources were not calculated for areas beyond line shown because of insufficient data.

FAULT—Dashed where approximately located; bar and half on downthrown side where direction of movement is known.

ANTICLINE—Showing axial trace and direction of plunge; dashed where inferred.

To convert feet to meters, multiply feet by 0.3048

Base from U.S. Geological Survey, 1955. Compiled in 1979.
