BLOCKER QUADRANGLE
OKLAHOMA
7.5 MINUTE SERIES (TOPOGRAPHIC)

EXPLANATION

NOTE: The explanation has been compiled to depict all possible combinations of data and does not intentionally represent any particular data point.

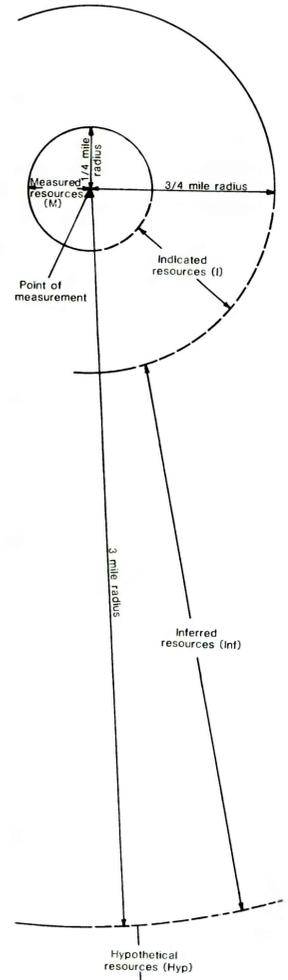

NON-FEDERAL COAL LAND--Land for which the Federal Government does not own the coal rights.

LAKE SHORE LINE--Showing shoreline of major lakes, at normal pool elevation. Coal resources (Reserve Base and Hypothetical) were not calculated below the waterline of major lakes.

3000-FOOT OVERBURDEN LINE--Line showing 3000 feet (914.4 meters) of overburden. Coal resources (Reserve Base and Hypothetical) were not calculated in areas having more than 3,000 feet of overburden. Arrow points toward area with less than 3000 feet of overburden.

Surface	Subsurface	In-situ
RB	R(50%)	RB(IS)
0.01	0.01	0.78
0.61	0.30	1.51
0.45	0.45	0.45

IDENTIFIED AND HYPOTHETICAL COAL RESOURCES--Showing totals for Reserve Base (RB), Reserves (R), and Hypothetical (Hyp) resources in millions of short tons, for each section or part of section of non-leased Federal coal land, both within and beyond the stripping-limit line. Reserve (R) tonnage is calculated by multiplying the Reserve Base (RB) tonnage by the appropriate recovery factor. Reserve tonnages are not calculated from in-situ Reserve Base tonnages. Dash indicates no resource in that category. 0.00 indicates that there are resources less than 10,000 short tons, in that category.

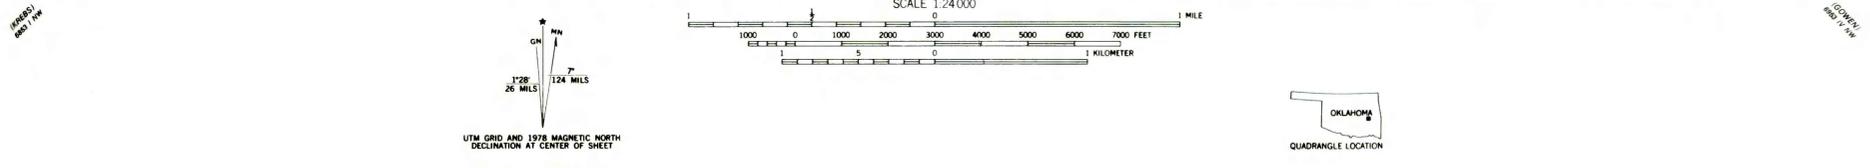

BOUNDARY LINES--Enclosing areas of measured (M), indicated (I), inferred (Inf) parts of identified coal resources. Dashed where projected from adjacent quadrangles. Hypothetical (Hyp) coal resources are located beyond the inferred part of identified coal resources (more than 3 miles from a measurement point).

To convert short tons to metric tons, multiply short tons by 0.9072.

To convert feet to meters, multiply feet by 0.3048.

To convert miles to kilometers, multiply miles by 1.6093.
