

**EXPLANATION**

BLM-C-029856

FEDERAL COAL LEASE BOUNDARY--Lease number within boundary.

COAL ISOPACH--Showing thickness of coal, in feet. Arrow points towards area where coal bed is 1 foot or more thick.

NON-FEDERAL COAL LAND--Land for which the Federal Government does not own the coal rights.

TRACE OF COAL BED ON TOP--Showing symbol of name of coal bed (as shown on Plate 1). Arrow points toward coalbearing area.

150SL

STRIPPING-LIMIT LINE--Boundary for surface mining (in this quadrangle, the 150-foot overburden isopach). Arrow points toward the area suitable for surface mining where the recovery factor is 80% and away from the area suitable for subsurface mining (down dip to the 3,000-foot-overburden isopach) where the recovery factor is 50%.

MINE WORKINGS AND STRIPPED AREAS--Showing mined-out areas. Hachures are inside mined-out areas. Narrow strips between mines where undisturbed coal is less than 75 meters from the nearest mine are considered to have no reserves and are included within mined-out areas.

Surface	Subsurface	In-situ
RB	RB	RB(IS)
0.78	0.39	(Measured)
0.01	0.01	(Inferred)
0.61	0.30	0.45 (Inferred)
Hyp. 0.00	Hyp. 0.00	(Hypothetical)

IDENTIFIED AND HYPOTHETICAL COAL RESOURCES--Showing total Reserve Base (RB), Reserves (R), and Hypothetical (Hyp) resources in millions of short tons for each section or part of section of non-leased Federal coal land, both within and beyond the stripping limit line. Reserve (R) tonnage is at 1.6091 metric tons. Reserve Base (RB) tonnage by the appropriate recovery factor. Reserve tonnage are not calculated from in-situ Reserve Base tonnage. Inf. indicates no resource in that category. 0.00 indicates that there are resources less than 10,000 short tons in that category.

BOUNDARIES--Showing areas of measured (M), indicated (I), inferred (Inf) parts of identified coal resources. Dashed where projected from adjacent quadrangles. Hypothetical (Hyp) coal resources are located beyond the inferred part of identified coal resources (more than 3 miles from a measurement point).

To convert short tons to metric tons, multiply short tons by 0.9072.

To convert feet to meters, multiply feet by 0.3048.

To convert miles to kilometers, multiply miles by 1.6093.
