IDENTIFIED RESOURCES OF COAL BED-  
In millions of short tons. Dash indicates no resources in that category. Reserve Base (RB) x the recovery factor (95%) = Reserves (R).

TRACE OF COAL BED OUTCROP-Arrow points toward the coal-bearing area. Coal bed dashed where inferred.

To convert short tons to metric tons multiply short tons by 0.9072.

This outcrop mapping is derived and enlarged from a 1:125,000 scale publication from Wegemann (1912, Plate XLII). Numerous irregularities in outcrop elevations and the area geology-topographic map relationship emphasize that this map presents a generalized configuration of the coal bed outcrop. Horizontal accuracy of outcrop location is estimated at ± 1000 feet (305 m).
