

EXPLANATION

NON-FEDERAL COAL LAND-Coal tonnages not evaluated.

COAL LEASE-Coal Lse.

PREFERENCE RIGHT LEASE APPLICATION-PRLA

KRCRA

KNOWN RECOVERABLE COAL RESOURCE AREA-KRCRA

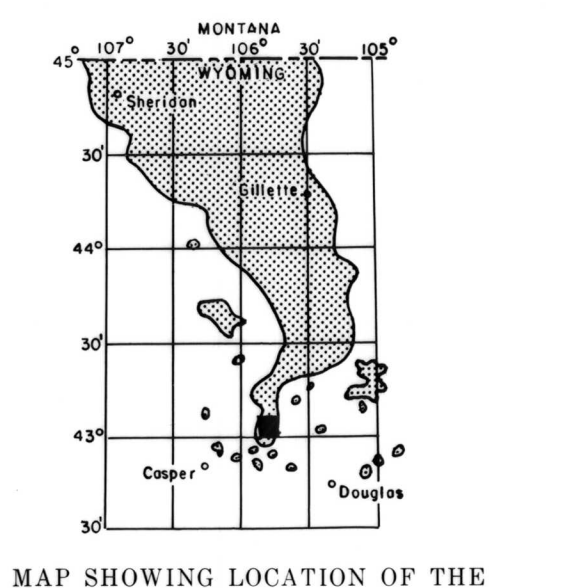

RB R(95%) (Measured)
— — (Indicated)
- - - (Inferred)
Hyp. 0.45 (Hypothetical)

IDENTIFIED RESOURCES OF COAL BED-
In millions of short tons. Dash indicates no resources in that category. Reserve Base (RB) x the recovery factor (95%) = Reserves (R).

TRACE OF COAL BED OUTCROP-Arrow points toward the coal-bearing area. Coal bed dashed where inferred.

To convert short tons to metric tons multiply short tons by 0.9072.

This outcrop mapping is derived and enlarged from 1:62,500 and 1:30,000 scale publications from Sharp and Gibbons (1964, Plate 1) and Smith and others (1972, Fig. 7). Numerous irregularities in outcrop elevations and the areal geology-topographic map relationship emphasize that this map presents a generalized configuration of the coal bed outcrop. Horizontal accuracy of outcrop location is estimated at ± 1000 feet (305 m).

This report has not been edited for conformity with U. S. Geological Survey editorial standards or stratigraphic nomenclature.
