

This report has not been edited for conformity with Geological Survey editorial standards or stratigraphic nomenclature.

EXPLANATION

1200

OVERBURDEN ISOPACHS—Showing thickness of overburden, in feet, from the surface to the top of the Menefee Allison No. 1 bed. Isopach interval 100/200 feet. Isopachs dashed where inferred.

0

MEASURED SECTION—Showing thickness of overburden in feet, from surface to the top of the Menefee Allison No. 1 bed.

indicates overturned beds.

MINING RATIO CONTOUR FOR MENEFEE ALLISON NO. 1 BED—Number indicates cubic yards of overburden per ton of recoverable coal by surface-mining methods. Contours shown only in areas suitable for surface mining within the stripping limit (less than 200 feet of overburden).

FAULT—Dashed where approximately located; bar and bell on downthrown side.

To convert feet to meters, multiply feet by 0.3048.

NOTE: The measured sections were taken on the outcrop line, as shown above. Arrow points toward the coal-bearing area.
