

EXPLANATION

OVERBURDEN ISOPACHS—Showing thickness of overburden, in feet, from the surface to top of the Menefee Cleary No. 2 coal bed. Isopach interval 200 feet with a supplemental 100 foot isopach; dashed where inferred.

DRILL HOLE OR MEASURED SECTION—Showing thickness of overburden, in feet, from surface to top of the Menefee Cleary No. 2 bed.

MINING RATIO CONTOUR FOR MENEFEE CLEARY NO. 2 COAL BED—Number indicates cubic yards of overburden per ton of recoverable coal by surface mining methods. Contours shown only in areas suitable for surface mining within the stripping limit (less than 200 feet of overburden).

To convert feet to meters, multiply feet by 0.3048.

NOTE: The measured sections were taken on the outcrop line, as shown above. Arrow points toward the coal-bearing area.
