

OPEN-FILE REPORT
This report has not been edited for conformity with U.S. Geological Survey editorial standards or stratigraphic nomenclature.

EXPLANATION

— B —
BOUNDARY OF COAL 5 FEET OR MORE THICK—
Drawn along the outcrop of coal bed and/or the inferred contact between burned and unburned coal and/or the 5-foot coal isopach. Arrows point toward area of coal 5 feet or more thick.

NON-FEDERAL COAL LAND—Land for which the Federal Government does not own the coal rights.

+
POINT OF MEASUREMENT ON COAL BED

IDENTIFIED COAL RESOURCES—Showing totals for Reserve Base (RB), in millions of short tons, for each section or part(s) of a section of Federal coal land outside the stripping-limit line. Dash indicates no resources in that category.

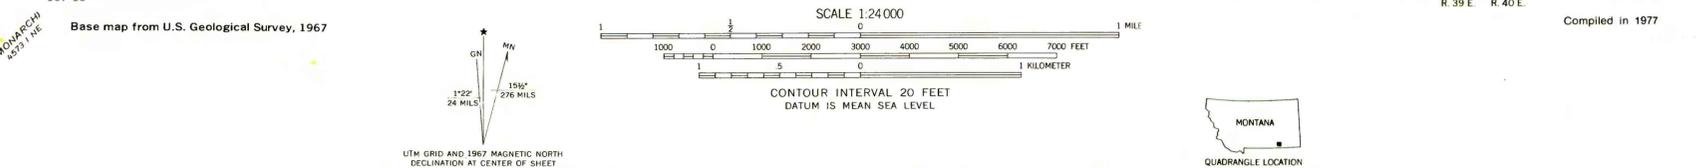

NOTE: No stripping-limit line is shown because there is more than 500 feet of overburden above the Reserve Base coal.

To convert short tons to metric tons, multiply short tons by 0.9072.

To convert miles to kilometers, multiply miles by 1.61.

To convert feet to meters, multiply feet by 0.3048.

NOTE: Recovery factors have not been established for underground development of coal in this quadrangle. Therefore, Reserves (R) were not calculated for the coal bed in areas outside the stripping-limit line.

COAL RESOURCE OCCURRENCE MAP OF THE PEARL SCHOOL QUADRANGLE, BIG HORN COUNTY, MONTANA BY COLORADO SCHOOL OF MINES RESEARCH INSTITUTE 1979
