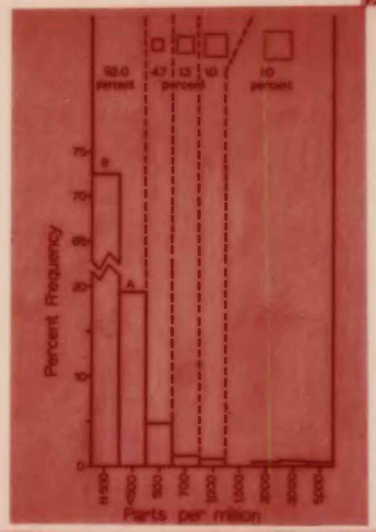
UNITED STATES GEOLOGICAL SURVEY

OPEN-FILE REPORT
79-837-1



79-837-1

Figure 1.--Histogram for zinc in 623 nonmagnetic (at >0.6 ampere) samples of heavy-mineral concentrates from stream sediments, Survey Pass 1° x 3° quadrangle, Alaska, showing map symbols corresponding to anomalous concentrations in parts per million, percentage of total samples, and letters corresponding to non-anomalous concentrations in parts per million. N, not detected at values shown; <, detected, but less than value shown. Arithmetic mean, 962; standard deviation, 1,039; geometric mean, 730; and geometric deviation, 1.9, based on unqualified values within the sample population.

EXPLANATION

ZINC SAMPLE SITES--Letters and sizes of symbols are explained on histogram (fig. 1) -

Anomalous

A Not anomalous

NOTE

This map is one in a series of geochemical maps concerning the Survey Pass 1° x 3° quadrangle, Alaska. For discussion of analyses and sampling see Cathrall and others, 1979.

Cathrall, J. B., Cooley, E. F., McManal, S. K., and Billings, T. M., 1979, A listing and statistical summary of spectrographic analyses of heavy-mineral concentrates from stream-sediment samples for the Survey Pass quadrangle, Alaska: U.S. Geological Survey Open-File Report 79-837-B.

Base from U.S. Geological Survey, 1956
