

EXPLANATION

- ISOPACH—Showing thickness of coal, in feet. Arrow points toward area where coal bed is 5 feet or more thick.
 - TRACE OF COAL BED OUTCROP—Showing symbol of name of coal bed. Arrow points toward coal-bearing area. Dashed where inferred by present authors.
 - POINT OF MEASUREMENT—Point from which boundary lines for measured, indicated, and inferred coal resources were drawn.
 - FAULT—Dashed where approximately located.
- | RB R(50%) | |
|-----------|-----------------|
| 0.2 | 0.1 (Measured) |
| 1.7 | 0.9 (Indicated) |
| — | — (Inferred) |
- IDENTIFIED COAL RESOURCES—Showing totals for Reserve Base (RB) and Reserves (R), in millions of short tons, for each section or part of section of non-leased Federal coal land within the KRCRA. Reserve (R) tonnage is calculated by multiplying the Reserve Base (RB) tonnage by the appropriate recovery factor. Dash indicates no resource in that category.

BOUNDARY LINES—Enclosed areas of measured, indicated, and inferred coal resources of the coal bed.

To convert short tons to metric tons, multiply short tons by 0.9072.

To convert feet to meters, multiply feet by 0.3048
