

EXPLANATION

ISOPACHS - Showing thickness of coal, in feet. Long dashed where inferred; short dashed where projected beyond coal-bearing area. Isopach interval 5 feet.

STRUCTURE CONTOURS - Drawn on top of coal bed. Solid where vertical accuracy within 40 feet; long dashed where vertical accuracy possibly not within 40 feet; short dashed where projected above ground surface. Contour interval 100 feet (31 m). Datum is mean sea level.

7401

2

DRILL HOLE - Showing altitude of top of coal bed, and thickness of coal, in feet.

A1[3] - Almond [3]

A1[L6] - Almond [Local 6]

COAL BED SYMBOLS AND NAMES - Coal beds identified by bracketed numbers are not formally named, but are numbered for identification purposes in this quadrangle only.

A1[3]

TRACE OF COAL BED OUTCROP - Showing symbol of name of coal bed as listed above. Arrow points toward coal-bearing area. Short dashed where inferred by present authors.

A1[3]

TRACE OF FAULT - Bar and ball on down-thrown side. Dashed where inferred or approximately located.

5/2

INTERBEDDED COAL AND ROCK - Showing total coal thickness/total rock thickness.

To convert feet to meters, multiply feet by 0.3048.

NOTE: Isopachs and structure contours are not drawn beyond dotted line because of insufficient data.
