Landslides and Related Features

Geoscientific Information

- Landslide susceptible to debris flows and slope failures
- Construction and related work
- Soil and rock susceptibility to landslides
- Water table depth
- Groundwater flow

Map Information

- Ohio Geological Survey
- Air photo 1954
- U.S. Geological Survey
- Open File Map 72-1146

References

- Soil and ground water
- Rock strength and permeability
- Slope stability
- Tree growth and soil conditions

Legend

- Active landslides
- Potential landslides
- Stabilized areas
- Road cuts
- Railroads
- Buildings
- Farmers
- Streams
- Water bodies
- Forests
- Farm lands
- Roads
- Other features

Note:
Descriptions are intended as a general guide to assist in identifying features. For detailed information, consult the original survey data.

Scale:
1 inch = 1 mile

Date:
May 1954
