

EXPLANATION

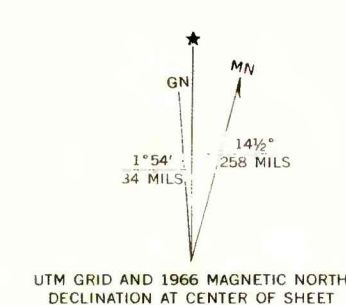

- 10 -----
----- 11 -----
ISOPACHS - Showing thickness of coal, in feet. Long dashed where inferred; short dashed where projected beyond coal-bearing area. Isopach interval 1 foot.
 - 7000 -----
----- 7100 -----
STRUCTURE CONTOURS - Drawn on top of coal bed. Solid where vertical accuracy within 40 feet; long dashed where vertical accuracy possibly not within 40 feet; short dashed where projected above ground surface. Contour interval 100 feet (31 m) and 200 feet (61 m) for the Fa[60] coal bed. Datum is mean sea level.
 - 6138
12.2
DRILL HOLE - Showing altitude of top of coal bed, and thickness of coal, in feet.
 - 11.1/6.5
INTERBEDDED COAL AND ROCK - Showing total coal thickness/total rock thickness.
 - ▲ 8290
7.5
POINT OF MEASUREMENT - Showing altitude of top of coal bed, and thickness of coal, in feet. Altitudes not shown for underground mine measured sections. Includes all points of measurement other than drill holes.
 - Fa[6] -----
TRACE OF COAL BED OUTCROP - Showing symbol of name of coal bed as listed above. Arrow points toward coal-bearing area. Short dashed where projected by present authors.
 - 15° -----
SUBSURFACE MINING LIMIT - Showing areas where dips of coal beds are greater than 15° and subsurface mining by conventional methods is not considered feasible. Reserve Base tonnages are calculated beyond limit; Reserve tonnages are not. Arrow points toward area where dips are greater than 15°.
 - C
INFERRED LIMIT OF BURNED AND CLINKERED COAL - Arrow points toward area of baked and fused rock.
- To convert feet to meters, multiply feet by 0.3048.

NOTE: Isopachs and structure contours are not drawn beyond dotted lines because of insufficient data.

Isopach and structure contour map of the Fairfield Coal Group, coal bed [12]
