

EXPLANATION

 NON-FEDERAL COAL LAND—Land for which the Federal Government does not own the coal rights, and for which the coal-development potential is not rated.

 AREA OF HIGH-DEVELOPMENT POTENTIAL—Area contains coal in beds 5 feet (1.5m) or more thick between depths of 200 feet (61.0m) and 1,000 feet (304.8m) below the surface and where the dip is 15 degrees or less.

 AREA OF LOW COAL-DEVELOPMENT POTENTIAL—Area contains coal in beds 5 feet (1.5m) or more thick at depths ranging from 200 to 3,000 feet (61.0 to 914.4m) below the surface and where the dip is greater than 15 degrees.

 AREA OF INSUFFICIENT DATA—Area where the geology is uncertain. There may or may not be coal occurring between 200 feet (61.0m) to 3,000 feet (914.4m) of the surface.

This report has not been edited for conformity with Geological Survey editorial standards or stratigraphic nomenclature.
