

This report has not been edited for conformity with Geological Survey editorial standards or stratigraphic nomenclature.

EXPLANATION

OVERBURDEN ISOPACHS—Showing thickness of overburden, in feet, from the surface to the top of the Crevasse Canyon Dilco No. 8 coal bed. Isopach interval 100 feet (30.5 meters). Isopachs dashed where inferred. Stripping limit is 200 feet (61 meters).

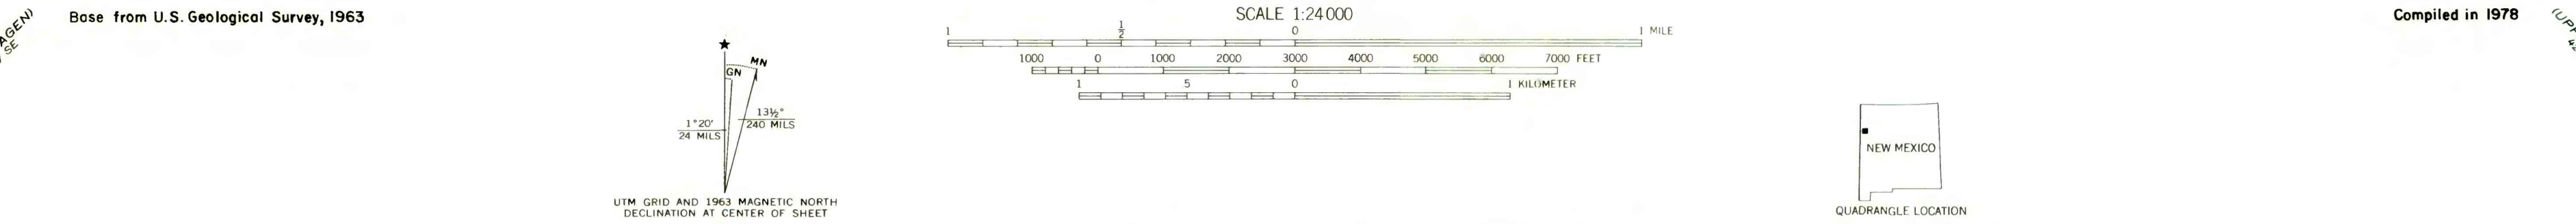

DRILL HOLE—Showing thickness of overburden, in feet, from the surface to the top of the Crevasse Canyon Dilco No. 8 coal bed.

TRACE OF COAL BED OUTCROP—Showing no overburden at triangle. Arrow points toward the coal-bearing area. Dashed line indicates inferred outcrop.

MINING RATIO CONTOUR FOR THE CREVASSE CANYON DILCO NO. 8 COAL BED—Number indicates cubic yards of overburden per ton of recoverable coal by surface mining methods. Contours shown only in areas suitable for surface mining within the stripping limit, less than 200 feet (61 meters) of overburden.

To convert feet to meters, multiply feet by 0.3048.

NOTE: Certain contour or outcrop lines in the high density areas have been shown in part or omitted for clarification in mapping.
