

200
R290

EXPLANATION

Contour interval in area B1 is 100 nT. Values other than 0 not shown on map. H represent magnetic high; L represents magnetic low. Contours represent residual absolute total-field intensity after removal of the International Geomagnetic Reference Field (1965.0) and adjustment to plane of observation 6000 feet (1830 meters) above mean sea level.

TOTAL INTENSITY MAGNETIC ANOMALY MAP OF THE RED SEA AND ADJACENT COASTAL AREAS
