BATHYMETRIC MAP OF THE WESTERN GULF OF ALASKA

by

J.M. Dunlavey, J.R. Childs and R.E. von Huene

1980

EXPLANATION

Contour interval 10 meters on continental shelf. A 20 or 25 meter interval is used where data does not permit a 10 meter interval. 100 or 500 meter intervals are used below the 300 meter level depending on the density of data. Dashed lines indicate where data is sparse. Features pointing inward indicate enclosed depressions in the seafloor and solid features pointing outward indicate raised high areas.

Land areas

offshore contour interval 10 m, 25 m, and 100 m
onshore contour interval 200 ft with 100 ft contours represented by dotted lines

Albers Conic Equal-Area Projection

Based on parallels 55° N. and 65° N.
