BATHYMETRIC MAP OF THE WESTERN GULF OF ALASKA

by

J.M. Dunlavey, J.R. Childs and R.E. von Huene

1980

EXPLANATION

Contour interval 10 meters on continental shelf. A 20 or 50 meter interval is used where sparse data does not permit a 10 meter interval. 100 or 500 meter intervals are used below the 500 meter level depending on the density of data. Dashed lines indicate where data is sparse, moisture plowing toward coastline and numerous points toward indeterminate subbottom highs.

Land areas.

Offshore contour interval 10 m, 25 m, and 100 m. Onshore contour interval 200 m with 100 ft contours represented by dotted lines.

Albers Conic Equal-Area Projection.

Based on parallels 55° N. and 65° N.

INDEX MAP
