DEPARTMENT OF THE INTERIOR
UNITED STATES GEOLOGICAL SURVEY

DESCRIPTION OF MAP UNITS (PLATE 4)

MAN-MADE DEPOSITS

Clay

Soil deposits (modified):
- Heavy clays, silts, and sands
- Deposited by human activity
- Typically found in agricultural areas

FAN DEPOSITS

Clay

Small fans at the mouths of intermontane valleys and gullying along mountain fronts, generally composed of poorly sorted gravels, silts, and clays. Deposition occurs largely as a result of human activity and is often associated with irrigation canals, roads, and mining areas.
