NOTE: Spot depths above 56° N are based on trackline data from the U.S. Geological Survey 1976 geophysical cruise of the S.F. Lee (LS-76-88).

This report is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards.

Albers conic equal-area projection based on standard parallels 55° and 63°N. Onshore and offshore contour interval 500 meters with a 200 meter contour added offshore. Spot depths in meters.
