

SEISMIC PROFILES FROM WILLAPA BAY, WASHINGTON

By

G.W. Hill, R.L. Phillips and H.E. Clifton

1981

THIS REPORT IS PRELIMINARY AND HAS  
NOT BEEN REVIEWED FOR CONFORMITY WITH  
US GEOLOGICAL SURVEY EDITORIAL STANDARDS

Data type shown: single channel seismic  
reflection (uniboom) profile

These data are examples of the original records and are presented  
to show the quality and volume of the material that is available.  
If the scale of the accompanying records is not adequate for a  
particular use, 35-mm continuous-flow microfilm is available for  
reproduction at whatever scale is required. To obtain the micro-  
film, contact T. E. Chase (Project Chief), Marine Scientific Data  
Center, Office of Marine Geology, Hall Stop 99, 345 Middlefield  
Road, Menlo Park, California, 94025.
