BIBLIOGRAPHY OF REPORTS RESULTING FROM U.S. GEOLOGICAL SURVEY

SCIENTIFIC AND TECHNICAL COOPERATION WITH OTHER COUNTRIES,

1975 to JUNE 1980

By Wenonah E. Bergquist, Elizabeth J. Tinsley,

and Valerie S. Upton

INTRODUCTION

This bibliography is a supplement to U.S. Geological Survey Bulletins 1426 (Bergquist, 1976) and 1263 (Heath and Tabacchi, 1968). The papers listed result from work undertaken by the U.S. Geological Survey (USGS), in cooperation with national earth-science agencies in other countries, partly through technical assistance projects under the auspices of the Agency for International Development, U.S. Department of State, partly under reimbursable assistance projects with other governments on behalf of the Department of State, partly under assistance projects sponsored by international organizations, and partly under scientific exchange projects supported by U.S. agencies such as the National Science Foundation.

This report includes titles published during the period 1975 through June 1980, but is not necessarily complete, as an exhaustive search was not made. Only reports authored solely or in part by USGS members or jointly by USGS and counterpart staff members are listed. Many other reports on USGS cooperative work abroad that were authored entirely by counterpart scientists are not included here. Seven geographic regions and 71 countries are represented. A few titles published prior to 1975 that were not listed in Bulletins 1263 or 1426 are included in this listing.

The reports are listed alphabetically by author, under the appropriate country. Reports of wider geographic scope are given under the continent or geographic region, for example, Africa, Central and South America, or CENTO region. Reports not classifiable by geographic location are listed under the heading "General." All references to reports on water resources and hydrology were provided by J. R. Jones or R. M. Beall, USGS.

ORDERING U.S. GEOLOGICAL SURVEY BOOK REPORTS AND MAPS

Professional Papers, Bulletins, Water-Supply Papers, Techniques of Water-Resources Investigations, Circulars, single copies of the Earthquake Information Bulletin, and some miscellaneous reports, including some from all the foregoing series are listed by the Superintendent of Documents as out of print, may be ordered from the Branch of Distribution, U.S. Geological Survey, 1200 South Eads Street, Arlington, VA 22202, or are available over the counter at USGS

offices at Room 1C402, National Center, 12201 Sunrise Valley Drive, Reston, VA 22092; Room 1028, General Services Building, 19th and F Streets, NW, Washington DC 20244; Room 1012 Federal Building, 125 South State Street, Salt Lake City, UT 84138; Room 1C45, Federal Building, 1100 Commerce Street, Dallas, TX 75242; Room 7638, Federal Building, 300 North Los Angeles Street, Los Angeles, CA 90012; Room 504, Custom House, 555 Battery Street, San Francisco, CA 94111; Room 678, U.S. Court House, West 920 Riverside Avenue, Spokane, WA 99201; and Room 108, Skyline Building, 508 Second Avenue, Anchorage, AK 99501. Subscriptions to the Earthquake Information Bulletin can be obtained only from the Superintendent of Documents, Government Printing Office, Washington, DC 20402.

Map orders should be addressed to Branch of Distribution, U.S. Geological Survey, 1200 South Eads Street, Arlington, VA 22202. Maps may be purchased over the counter at USGS offices where book reports are sold and at 1400 Independence Drive, Rolla, Missouri; 345 Middlefield Road, Menlo Park, California; and Federal Building, 110 Twelfth Avenue, Fairbanks, Alaska. USGS maps are also sold by some 1,650 commercial dealers throughout the United States.

Open-File reports are generally available from the Open-File Services Section, Branch of Distribution, U.S. Geological Survey, Box 25325, Federal Center, Denver, CO 80225, for the cost of duplicating.
