DIRECTORY OF ASSISTANCE CENTERS OF THE NATIONAL WATER DATA EXCHANGE (NAWDEX)

By

Beverly M. Josefson and Cassandra D. Blackwell

ABSTRACT

The National Water Data Exchange (NAWDEX), managed by the U.S. Geological Survey, has established a network of Assistance Centers throughout the United States and Puerto Rico to assist users of water data in identifying and locating the data they need. This Directory provides the information needed to contact any of the established Centers.

INTRODUCTION

The National Water Data Exchange (NAWDEX) is a nationwide program managed by the U.S. Geological Survey to assist users of water data or water-related data in identifying, locating, and acquiring needed data. NAWDEX is a confederation of water-oriented organizations working together to make their data more readily accessible and to facilitate a more efficient exchange of water data.

NAWDEX services are available through a Program Office located at the U.S. Geological Survey's National Center in Reston, Virginia, and a nationwide network of Assistance Centers established in 45 states and Puerto Rico to provide local and convenient access to NAWDEX facilities. This Directory provides the names of organizations and persons to contact, addresses, telephone numbers, and the various types of data and services available at each location.

SERVICES AVAILABLE

A variety of user services are provided by NAWDEX. These include assistance in identifying and locating needed water data and referring the requester to the organization that retains the data required. A Master Water Data Index is maintained which allows NAWDEX to locate those sites for which desired water data are available, and to provide the identifying information for each site necessary to obtain the data from the organization retaining it. A Water Data Sources Directory is also maintained that identifies organizations that are sources of water data and locations within these organizations from which data may be obtained. NAWDEX services are available to any organization or individual.

SERVICE CHARGES

Charges for NAWDEX services are assessed at the option of the organization providing the requested data or data service. Search assistance services are provided free by NAWDEX to the greatest extent possible. Charges are assessed, however, for those requests requiring computer services, extensive personnel time, duplicating services, or service costs accrued by NAWDEX from other sources in the course of providing services. In all cases, charges assessed by NAWDEX Assistance Centers will not exceed the direct costs incurred in responding to the data request. Estimates of cost are provided by NAWDEX upon request and in all cases where costs are anticipated to be substantial.

ADDITIONAL INFORMATION

The participation of private organizations as NAWDEX Assistance Centers does not imply endorsement by the U.S. Geological Survey of any organization, service, system, or product within the private sector. Rather, the NAWDEX program serves as a public forum for informing its users of data services and products available from all sectors of the water-data community. For additional information concerning the NAWDEX program or its services, contact:

ORGANIZATION: M/A-Com Sigma Data personnel provide computerized data storage,
retrieval and analysis systems for their customers. These
systems are designed for the non-computer-oriented user. The
user may select from a wide variety of data, restrict the data
in any way by application of Boolean logic, and analyze it
interactively. Our analytical procedures include data manipu-
lation, statistical, and graphic analyses. We also, provide
a wide range of User Support functions, including data acquisi-
tion, documentation, problem solving, and analytical consulta-
tion and operations.

ORGANIZATION: HDR Systems provides timesharing services to our clients through the CDC Cyber 730. We utilize both Tymnet and WATS for our communications access. The Cyber is 198K - 60 bit words, 2.5+ billion characters of disk storage with 14 peripheral processors. The application library, available to users, contains: Engineering, Financial Planning/Modeling, Plotting, Research/Statistical, Data Base Management, Graphics, and Business.

HCMAPPER is specifically designed for the map-plotting of data stored in the Master Water Data Index (MWDI). Subsets of data may be retrieved from the MWDI using the NAWDEX generalized retrieval system and transferred to HDR Systems, Inc. for plotting. The NAWDEX Program Office will assist users in this transfer process until automated transfer procedures can be established for this purpose. Also, for those users whose needs are such that direct access to HCMAPPER is not practical or desired, HDR SYSTEMS, Inc. will produce maps as a product service.

LIST OF ACRONYMS AND ABBREVIATIONS

The following acronyms and abbreviations are used throughout this report to avoid unnecessary repetition in listing the data bases accessed by the various NAWDEX Assistance Centers, and in referring to the agencies who maintain these data bases.

CEQ - [President's] Council on Environmental Quality.

GWSI - Ground Water Site Inventory File. Maintained by U.S. Geological Survey, Water Resources Division.

HISARS - Hydrologic Information Storage and Retrieval System. A program for storing and retrieving streamflow and peak flow data, and weather information (precipitation).

IDB - Integrated Data Base. Maintained by Council on Environmental Quality.

LANDSAT - Land Satellite Data.

MWDI - Master Water Data Index. An index of water data sites maintained by the National Water Data Exchange, U.S. Geological Survey.

MIS - Management Information System. Data base maintained by the Operations Section, Water Resources Division, U.S. Geological Survey.

NAWDEX - National Water Data Exchange.

NNRIS - Nebraska Natural Resources Information System. A computerized information system (Data Bank) maintained by the Nebraska Natural Resources Commission.

NOAA - National Oceanic and Atmospheric Administration.

PUBMANUS - Computerized bibliographic file of published reports and thematic maps of the U.S. Geological Survey.

SAROAD - Storage and Retrieval of Aerometric Data. A U.S. Environmental Protection Agency computerized data base.

STORET - Storage and Retrieval System. A computerized water quality data base maintained by the U.S. Environmental Protection Agency.

TNRIS - Texas Natural Resources Information System. A centralized computer facility which handles storage, retrieval, processing, analysis, and presentation of natural resources data and information for the State of Texas.

USGS - U.S. Geological Survey.

- WATS - Wide-area Telecommunications Service (American Telephone and Telegraph Company contract billing system).
- WATSTORE - National Water Data Storage and Retrieval System. A large-scale computer system developed by the U.S. Geological Survey for the storage and retrieval of water data.
- WDROP - Water Drop. A U.S. Environmental Protection Agency computerized data files.
- WDSD - Water Data Sources Directory. A computerized data base maintained by the National Water Data Exchange which lists organizations which are sources of water data and water-related data.
- WRSIC - Water Resources Scientific Information Center, Office of Water Research and Technology. This office produces the Selected Water Resources Abstracts journal.
