

EXPLANATION

- METAMORPHIC ROCKS**
- e Eliot Formation
 - k Kittery Formation
 - rv Metavolcanic Member
 - rm Metasedimentary Member
 - fb Fish Brook Gneiss, Boxford Formation and associated metamorphic rocks
- } Ordovician or older
 } Precambrian (?)
- IGNEOUS ROCKS**
- v Newbury Volcanics Silurian and Devonian (?)
 - cag Cape Ann Granite, Peabody Granite and associated intrusives
 - sd Sharpners Pond Diorite and associated granitic intrusives
 - nqd Newburyport Quartz Diorite
 - sgd Salem Gabbro-Diorite
 - tg Topsfield Granodiorite and intruded metavolcanics
- } Devonian to Ordovician
 } Precambrian
- ? Projected fault traces offshore
 - - - Projected contacts offshore
 - - - Fault onshore
 - Contact onshore
 - "cag" Suspected lithic units offshore
