

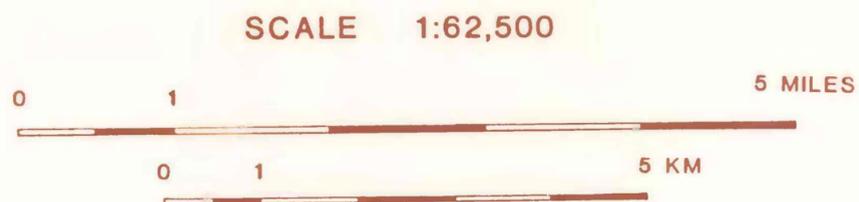

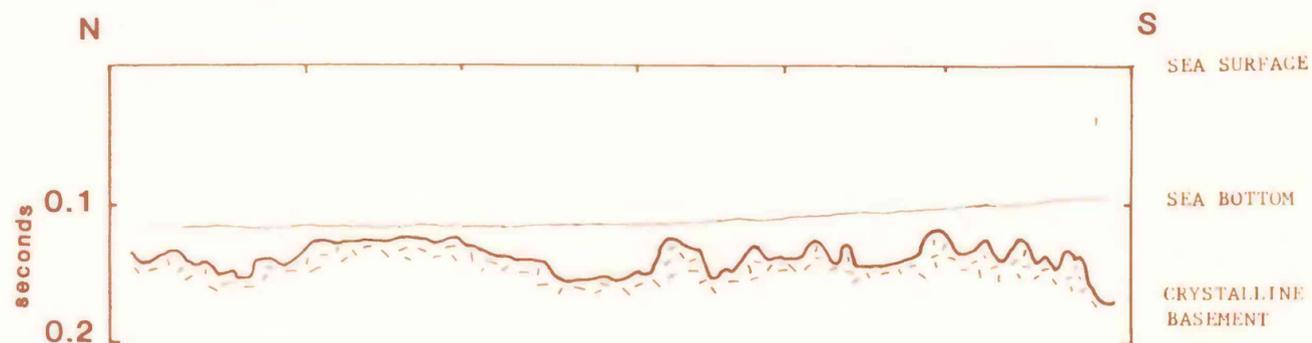

PLATE 2. INTERPRETIVE SEISMIC PROFILES - R/V ASTERIAS

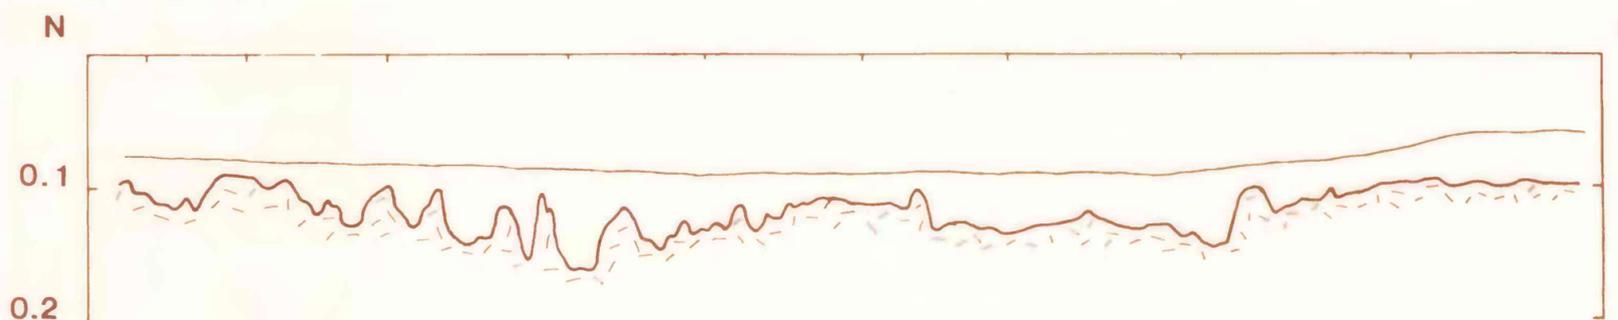

NOTE: Allowing for two-way travel time, 0.1 second in seawater ($V=1500$ m/sec) corresponds to a depth of 75 meters. In unconsolidated sediments ($V=1400$ to 2000 m/sec) a two-way travel time of 0.1 sec corresponds to a thickness of 70 to 100 meters.
