EXPLANATION

RESOURCE AREA BOUNDARY--Approximately located, encloses regions of past or present known or potential mining activity for the metals and nonmetal commodities indicated, as well as regions that have been explored for them. The limits include mined and prospected areas as well as areas based on the projection of geologic data. The limits are not legal Mining District boundaries and may include more than one district as well as adjacent areas having resource potential. Informal names are used for those areas that have no formal name. Areas which contain only building materials are not shown. For description of areas, see accompanying pamphlet.
