**Figure 18.**-Areas of similar dissolved-solids concentrations in samples from wells in the Hueco bolson, 1979-81

**EXPLANATION**

**WELL USED FOR CONTROL**

**AREAS OF SIMILAR DISSOLVED-SOLID CONCENTRATION**

- **<500** milligrams per liter. Very freshwater.
- **500-1000** milligrams per liter. Freshwater.
- **>1000** milligrams per liter. Moderately saline water.
- Variable fresh to slightly saline water.

**Bases from U.S. Geological Survey.**

Isometric quadrangles.
