OPEN-FILE REPORT 83-869

EXPLANATION

- POTENTIOMETRIC CONTOUR—Shows altitude at which water level would have stood in tightly cased wells. Contour intervals 5, 10, and 40 feet. Datum is National Geodetic Vertical Datum of 1929 (NGVD).
- WELL—Number is altitude of water level above or below NGVD.
- SPRING
- STATE WATER MANAGEMENT DISTRICT BOUNDARY
  - SRWMD—St. Johns River Water Management District
  - SRWMD—Suwannee River Water Management District
  - SFWMD—South Florida Water Management District
  - SWFWMD—Southwest Florida Water Management District
- SUBBASIN BOUNDARY WITHIN THE SFWMD

NOTE: The potentiometric contours are generalized to portray synoptically the head in a dynamic hydrologic system taking due account of the variations in hydrogeologic conditions such as differing depths of wells, nonsimultaneous measurements of water levels, variable effects of pumping, and changing climatic influence. The potentiometric contours thus may not conform exactly with individual measurements of water level.
