REPORTS ON THE WATER RESOURCES OF FLORIDA, 1886-1986

Fourth Edition

By Maude Claiborne, Teresa L. Embry, Nevin D. Hoy, Deborah H. Weldon,
and Twila D. Wilson

INTRODUCTION

The U.S. Geological Survey has been making investigations of the water resources of Florida since the latter part of the 19th century. The earlier work consisted mainly of data collection at a few spring and river sites at intermittent intervals with the exception of a statewide ground-water study made during 1910-12 (Matson and Sanford, 1913).

In 1930, an office was established for surface-water studies in Florida and in 1938 for ground-water studies. Since 1930, practically all of the water-resources investigations made by the U.S. Geological Survey have been in cooperation with State and local agencies.

This fourth edition, "Bibliography of U.S. Geological Survey Reports on the Water Resources of Florida, 1886-1986" includes reports released through December 1986. To help make the bibliography more useful to the user, it will be appreciated if discrepancies are noted and sent to the Publications Unit, U.S. Geological Survey, 227 North Bronough Street, Suite 3015, Tallahassee, Florida, 32301, so that corrections can be incorporated in the next edition.

The bibliographic list of publications which follows is arranged alphabetically by senior author. The publications are also indexed by geographic area (see p. VIII) and by subject.

AVAILABILITY OF FLORIDA REPORTS

Most of the reports concerning water resources in Florida may be inspected in the Florida District office of the U.S. Geological Survey, Suite 3015, 227 North Bronough Street, Tallahassee, FL 32301; at the U.S. Geological Survey Library in Reston, Va., and at libraries of the State University System of Florida in Boca Raton, Gainesville, Jacksonville, Miami, Orlando, Pensacola, Tallahassee, and Tampa.

The following shows the office you should write to for information about availability and price of U.S. Geological Survey and Florida Geological Survey (formerly called Florida Division of Geology and Florida Bureau of Geology) publications listed. In ordering publications, give the series designation (Map Series, Open-File, Report of Investigations, etc.) and number, full title, and author of the report.
