U.S. GEOLOGICAL SURVEY

Geological Literature
of the Alaska Peninsula to 1985

by

F.H. Wilson¹, S.Z. Gajewski¹, and L.A. Angeloni¹

Open-File Report 86-176

This report is preliminary and has not been reviewed for conformity with Geological Survey editorial standards and stratigraphic nomenclature.

¹U.S. Geological Survey, Anchorage, Alaska 99508

1986
INTRODUCTION

The geology of the Alaska Peninsula has been studied since the middle of the 19th century. Interest in coal, oil, and mineral exploration as well as studies of earthquakes and volcanoes resulted in an extensive geologic literature background for the Alaska Peninsula.

This bibliography on the geology and related subjects of the Alaska Peninsula was prepared as background for the U.S. Geological Survey Regional Alaska Mineral Resource Assessment Program II study of the Alaska Peninsula. The project area includes the following 1:250,000 scale quadrangles: Afognak, Bristol Bay, Chignik, Cold Bay, False Pass, Iliamna, Kaguyak, Karluk, Kodiak, Lake Clark, Mt. Katmai, Naknek, Port Moller, Simeonof Island, Stepovak Bay, Sutwik Island, Trinity Islands, Ugashik, and Unimak. This bibliography includes these quadrangles and selected references on the adjacent offshore areas of the Gulf of Alaska and Bristol Bay (Fig. 1).

SOURCES

Sources used for this bibliography include Geo-Ref computer data files, U.S. Geological Survey and State of Alaska published reports and bibliographies, and personal library files, including those of the late E. H. Cobb (U.S. Geological Survey, Menlo Park, CA.).
