

DEPARTMENT OF THE INTERIOR

U.S. GEOLOGICAL SURVEY

NEW INFORMATION RESOURCES OF THE U.S. GEOLOGICAL
SURVEY LIBRARY SYSTEM.

Open-file Report 86-400-F-G

This report is preliminary and has not been reviewed for conformity with the U.S. Geological Survey editorial standards.

1986

NEWS ITEMS

The Library System's LS2000 DATA BASE (on-line catalog) is nearing a total holding of 110,000 bibliographic records, thus expanding user access to the collection. All major USGS text publications are now included. User-friendliness has been expanded by the addition of form subject headings for retrieving significant subsets of publications: Current Survey publications (USGSPUBS), Open-file reports (USGSOFR), Water-resources investigations (USGSTWRI), Bulletins (USGSBULL), Circulars (USGSCIRC), Water-supply papers (USGSWSP), and Professional papers (USGSPP).

Five research librarians have completed major projects associated with publications.

Cheryl Sund of the Denver Regional Library completed a technical review of a forthcoming open-file report, Bibliography of Selected Papers on Geophysical Techniques in Searching for Ground Water. She did the original literature research for the project. Kay Baker completed the Denver Library's holding list for the upcoming 5th edition of "A Union List of Geologic Field Trip Guidebooks of North America." It is currently being prepared for publication by the Geological Information Society and the American Geological Institute. Jonathon Karrer, Reston, worked for three months accumulating 19th century data for the article "Remote Sensing and Geochemistry on the Shawanquk District, New York," by Jules Friedman (USGS) and Felix Mutschler. Also in Reston, Gertrude Sinnott and Carol Messick identified sources and proper citations for Dr. V. E. McKelvey's to-be-published (Bulletin Number 1689) "Subsea Mineral Resources".

Major productivity improvements have occurred in the Library System in recent months, resulting in BETTER INFORMATION provision for the user community. In cataloging materials for the collection, the number of titles cataloged for all locations surpassed 300 for the first time ever. Ninety percent (90%) of new titles are being cataloged and processed within one week; 100%, within 2 weeks. Cataloging of the backlog of materials has been accelerated. Gifts from the Water Resources Division are among the items at hand, in order to strengthen the collection in hydrology. The Denver Library has eliminated a backlog of serials, processing them into the collection, and has completed barcoding monographs for circulation. In the area of providing materials, a shelving backlog has been eliminated in Reston, and methodology for getting volumes from one System library to another has been streamlined.

GEOLOGICAL COMBINE PREVAILS! In a welcome change of policy, in terms of positive effect on user access to earth science information, the Library of Congress (LC) has agreed to permit use of the term 'formations' as a subject heading. It will be modified by the descriptor, 'geology', i.e., Formations (Geology). Individual formations may also be used. The Library System and the Geological Information Society have for years encouraged LC to expand geologic nomenclature.

The Library System, through the Acquisitions (Exchange and Order) Section, is cooperating with the National Technical Information Service in an experimental on-line ordering system called QuikOrder. The objective is to speed the obtaining of GOVERNMENT REPORTS for the users.

The Menlo Park Regional Library is developing a VIDEOTAPE COLLECTION. Contact Eleanore Wilkins, Head Librarian, about deposits and recommendations for purchase.

STAFF RETIREMENTS, RETURNS, REASSIGNMENTS

Bob Reed, Chief Cataloger of the Survey and Chief of the Catalog Section, retired July 3, after a career of more than 30 years with the USGS Library. As head of cataloging, he was responsible for management of the data base which is the gateway to the treasures of the collection. On July 2, Bob was honored at a luncheon and reception in the Reston Library attended by the staff, Mrs. Reed and a number of Bob's friends from the Survey and elsewhere. Henry Spall, Associate Director of the Office of Scientific Publications (OSP) presented Bob with a Certificate of Commendation in the form of a plaque. Bob also received a letter of thanks from John Aaron, Chief of OSP, as well as gifts from staff and other friends.

Jane Perry became Acting Chief of the Catalog Section on July 6th. She is the first incumbent therein in a series of rotational cross-training assignments.

Marge Dalechek, Head of the Photographic Library, retired June 3, after a career of 25 years with the Library. As Head, she was responsible for all functions of the photographic depository, from acquisition through preservation. A luncheon was held in Marge's honor on June 12. She was presented with a commemorative plaque and a number of gifts and mementos.

Carol Edwards and Joe McGregor are on rotation in the position of Head of the Photographic Library.

On June 19, Barbara Chappell returned as Chief of the Reference and Circulation Section after fulltime participation in the Interior Department Manager Development Program. During 9 1/2 months of training, Babara completed a variety of assignments at 5 information institutions and 3 management organizations. Barbara's comment upon returning: "The past several months have been both challenging and rewarding -- a time of concentrated learning -- but it's really nice to be back in the Library!"

QUOTE OF THE WEEK

From a Survey user in Raleigh, North Carolina to Jon Sellin, research librarian in Reston, after a successful piece of information detective work by Jon, "I wonder how many members of the USGS are aware of the expert and efficient service available to them from you and other members of the Survey Library staff."

Libraries in the Geological Survey Library System are located in the Eastern, Central, and Western Regions. Personnel whose duty station is other than Reston, Denver, Menlo Park or Flagstaff, may borrow items by completing an Accessions List Loan Request form and mailing it to the Survey Library in their Region if the item is available there or to the nearest Survey Library holding the item if it is not. Personnel whose duty station is Reston, Denver, Menlo Park or Flagstaff should continue to request items as they are accustomed to doing.

If a library is unable to fill a request immediately because its copy of the item is charged out or otherwise unavailable for loan, the request will be forwarded to any Survey Library which may be able to supply a copy. If no copy is available for immediate loan, the requester's name will be placed on a waiting list and the publication dispatched as soon as it becomes available. Publications with a waiting list are loaned for two weeks only; those without are loaned for thirty days. If there is no waiting list, the loan period may be extended by contacting the lending library prior to the expiration of the loan period and requesting a renewal.

In filling out the Loan Request form, it is essential that requesters include their (1) Division/Office/Branch affiliation, (2) complete mailing address, and (3) phone numbers, both commercial and FTS. Typing or printing such information will help avoid unnecessary delays in processing requests. Loan Request forms will be found at the end of each List; they should be duplicated if additional copies are required. A separate form should be used for each item requested.

Questions regarding entries in the List or the information to be supplied on the Loan Request form should be referred to the Library located in the same Region as the requester's duty station.

<u>Eastern Region</u>	<u>Central Region</u>	<u>Western Region</u>

GISSat

The above is a photocopy of a main entry card which is representative of the format arrangement appearing on cards filed in the Reston, Denver, Menlo Park and Flagstaff Library catalogs.

Appropriate information is selected and reformatted to produce subject-arranged entries similar to the following.

Personal
author

Primary subject heading

Title

COLORADO--MINERAL RESOURCES--MINERAL COUNTY REGION.

Crock, J. G.
(200) R29ono.83-405D,MP

GISS Major, minor, and trace elements in
samples from the Wheeler Wilderness Study
Area, Colorado, as determined by
inductively coupled argon plasma-atomic
emission spectrometry. 1983

USGS Library Call No.
indicating that Reston,
Denver, and Menlo Park
each have this item

Imprint (Publi-
cation date)

Title main entry

COSMOCHEMISTRY--CONGRESSES.
730.3C822

GISS Cosmochemistry and the origin of life
: proceedings of the NATO Advanced Study
Institute held at Maratea, Italy, June 1-
12, 1981. 1983

Additional explanation beyond that provided by the preceding examples seems appropriate.

Each entry consists of the following components which always appear in the order given: (1) Principal subject heading, always capitalized; (2) Main entry, which may be a personal author, corporate author, or title; (3) Title (if the main entry is either a personal or corporate author); (4) Imprint; (5) USGS call no., always located in the lower left and the last component in each entry.

The call number on catalog cards normally consists of two or more lines of a combination of letters and numbers, arranged in the following manner:

G(253)
F46
v.37
no.4
D,MP

In the Accessions List the same number appears in a straight line. There are no spaces to show where the call no. lines are broken on the catalog cards: G(253)F46v.37no.4D,MP

Call numbers prefixed with "M" indicate item is part of the map collection.

Call numbers prefixed with "R" indicate item is part of the Library's Reference collection. These items normally do not circulate.

Capital letter suffixes denoting which libraries (D = Denver, MP = Menlo Park, and F = Flagstaff), other than Reston, hold a particular item, follow the call no. and are set off from it by a space. Please note that no letter suffix is employed for Reston, which should be understood to hold the item unless otherwise indicated. In the call no. above, the Reston, Denver, and Menlo Park libraries each have this item.

If a library, other than Reston, is the sole holder of an item, the suffix statement will reflect that fact; for example: F only.

Occasionally an item will not be assigned a call no., receiving instead an alpha abbreviation, such as PAM = pamphlet or MICRO = microform. In such entries, that designation occupies the space normally set aside for the call no. When completing the Loan Request form, alpha abbreviations should be recorded on the call no. line.
