News Items

In response to a request from Elizabeth Yeates, the Chief Librarian, the WATER RESOURCES DIVISION (WRD) has appointed a Library System Advisory Group. Members are Darwin Alt, Chief of Publications Planning Unit, Paul Dresler, Assistant Chief, Branch of Regional Research, and Harry Lins, Hydrologist. The group met on August 21 to reach a consensus between the desiderata of the GEOLOGIC DIVISION (GD), as expressed by Branch Chiefs or Reston Representatives, and WRD in regard to circulation policy and procedures.

LIBRARY SYSTEM contribution to DISASTER STUDIES. Information on the Hubbard Glacier was used by remote-sensing geologists in preparing justification for a new project proposal on SLAR study of areas in Alaska at risk from flooding and erosional changes. Maps and reports on the Cameroons were used by the geological teams sent to Lake Niss, and an obscure volume on the Cameroons was obtained within a few working hours through interlibrary loan.

MEDIA USE LIBRARY SYSTEM MATERIALS. The Reston Library responded to a request from Trends Publications for copies of New Information Resources. Public Broadcasting Service obtained from the Denver Photo Library prints of photographs, taken by William Henry Jackson, for use in the program, "The West of the Imagination."

LESS BACKLOG! The Catalog Section is chipping away the backlog while keeping current on new materials. In August, the Section cataloged and added to LS/2000 1165 items, including new monographs, analytics, maps and serials as well as backlog items, branch title pages, and gifts.

INFORMATION ACCESS BROADENED IN THE DENVER LIBRARY, Caryl Shields has worked out the procedure for accessing from the IBM PC XT, the data base of the Public Access Catalog containing records from the Colorado Alliance of Research Libraries. All cataloging from 1979 forward is in this file, as well as an increasing number of retrospective records.

PRESERVATION OF RARE MATERIALS. Also in Denver, Joe McGregor oversaw the duplication of a significant group of nitrate negatives onto Kodak professional duplicating film. Upon duplication, the oldest remaining negative will be about 75 years old vs. 78 years. This year's project will finally complete duplication of Ernest de K. Leffingwell's photographs covering his expeditions of the 1905-06 and 1913-14, many of which were published in Professional Paper 109. A.H. Brooks recognized this expedition as being one of the first systematic attempts to document the Arctic coastline of Alaska.

In Menlo Park, THE PHOTO LIBRARY has acquired some 1939 1:20K and 1946 1:24K aerial photographs of the HAYWARD FAULT north of San Leandro and 1937 1:20K photos of the eastern foothills of the DIABLO RANGE in Stanislaus County.

Libraries in the Geological Survey Library System are located in the Eastern, Central, and Western Regions. Personnel whose duty station is other than Reston, Denver, Menlo Park or Flagstaff, may borrow items by completing an Accessions List Loan Request form and mailing it to the Survey Library in their Region if the item is available there or to the nearest Survey Library holding the item if it is not. Personnel whose duty station is Reston, Denver, Menlo Park or Flagstaff should continue to request items as they are accustomed to doing.

If a library is unable to fill a request immediately because its copy of the item is charged out or otherwise unavailable for loan, the request will be forwarded to any Survey Library which may be able to supply a copy. If no copy is available for immediate loan, the requester's name will be placed on a waiting list and the publication dispatched as soon as it becomes available. Publications with a waiting list are loaned for two weeks only; those without are loaned for thirty days. If there is no waiting list, the loan period may be extended by contacting the lending library prior to the expiration of the loan period and requesting a renewal.

In filling out the Loan Request form, it is essential that requesters include their (1) Division/Office/Branch affiliation, (2) complete mailing address, and (3) phone numbers, both commercial and FTS. Typing or printing such information will help avoid unnecessary delays in processing requests. Loan Request forms will be found at the end of each List; they should be duplicated if additional copies are required. A separate form should be used for each item requested.

Questions regarding entries in the List or the information to be supplied on the Loan Request form should be referred to the Library located in the same Region as the requester's duty station.

GISSat

The above is a photocopy of a main entry card which is representative of the format arrangement appearing on cards filed in the Reston, Denver, Menlo Park and Flagstaff Library catalogs.

Appropriate information is selected and reformatted to produce subject-arranged entries similar to the following.

COSMOCHEMISTRY--CONGRESSES.
730.3C822

Title main entry

GISS Cosmochemistry and the origin of life
: proceedings of the NATO Advanced Study
Institute held at Maratea, Italy, June 1-
12, 1981. 1983

Additional explanation beyond that provided by the preceding examples seems appropriate.

Each entry consists of the following components which always appear in the order given: (1) Principal subject heading, always capitalized; (2) Main entry, which may be a personal author, corporate author, or title; (3) Title (if the main entry is either a personal or corporate author); (4) Imprint; (5) USGS call no., always located in the lower left and the last component in each entry.

The call number on catalog cards normally consists of two or more lines of a combination of letters and numbers, arranged in the following manner:

G(253)
F46
v.37
no.4
D,MP

In the Accessions List the same number appears in a straight line. There are no spaces to show where the call no. lines are broken on the catalog cards: G(253)F46v.37no.4D,MP

Call numbers prefixed with "M" indicate item is part of the map collection.

Call numbers prefixed with "R" indicate item is part of the Library's Reference collection. These items normally do not circulate.

Capital letter suffixes denoting which libraries (D = Denver, MP = Menlo Park, and F = Flagstaff), other than Reston, hold a particular item, follow the call no. and are set off from it by a space. Please note that no letter suffix is employed for Reston, which should be understood to hold the item unless otherwise indicated. In the call no. above, the Reston, Denver, and Menlo Park libraries each have this item.

If a library, other than Reston, is the sole holder of an item, the suffix statement will reflect that fact; for example: F only.

Occasionally an item will not be assigned a call no., receiving instead an alpha abbreviation, such as PAM = pamphlet or MICRO = microform. In such entries, that designation occupies the space normally set aside for the call no. When completing the Loan Request form, alpha abbreviations should be recorded on the call no. line.
