</tbody>
</table>

*Notes:
- Water content is measured at regular intervals.
- Blow count represents the number of blows per foot.
- Percent recovery indicates the percentage of total drilled rock recovered.
- Drilling rate and reverse per minute are provided for reference.

---

**Log and Test Results**

**Boring OCT-5, Oak Crater**

**Enewetak Atoll, Marshall Islands**

---

**Details:**
- **Job No.:** 0185-1032
- **Final Penetration:** 851.1'
- **Date Completed:** May 20, 1985
- **Water Depth Measured:** 1715 hrs on May 21, 1985

---

**Core Descriptions:**
- **Sampler Type:**
  - SF - 2000 ft (610 m) core
  - SW - 2000 ft (610 m) core
- **Sample Collection:**
  - CS = Conventional system
  - CD = Direct core system
- **Sample Recovery:**
  - % Rec. Total Sample Recovered
  - % Rec. Total Interval Drilled
  - % Rec. Total Sample Recovered
  - % Rec. Total Interval Sampled

---

**Additional Notes:**
- The drilling rate is expressed as a solid line and the weight on bit by a dashed line on the graph.
- The core, sample, and thin section are shown in the formation.
