CONVERSION FACTORS

For the convenience of readers who may prefer to use metric (International System) units rather than the inch-pound units used in this report, values may be converted by using the following factors:

<u>Multiply inch-pound unit</u>	<u>By</u>	<u>To obtain metric unit</u>
inch (in.)	2.540	millimeter (mm)
foot (ft)	0.3048	meter (m)

SELECTED GROUND-WATER INFORMATION FOR THE COLUMBIA PLATEAU
REGIONAL AQUIFER SYSTEM, WASHINGTON AND OREGON, 1982-1985

VOLUME II. WATER LEVELS

By R. C. Lane

ABSTRACT

This data report presents ground-water information collected and analyzed as part of the U.S. Geological Survey's Columbia Plateau Regional Aquifer System Analysis study. The information was gathered from July 1982 through September 1985 in the part of the aquifer system in central and eastern Washington, and north-central and northeastern Oregon. The report consists of three volumes: volume I, geohydrology; volume II, water-levels; and volume III, ground-water quality.

INTRODUCTION

This report presents ground-water information collected and analyzed from July 1982 through September 1985 in the Columbia Plateau regional aquifer system of central and eastern Washington and north-central and northeastern Oregon (fig. 1). It is intended as a data report only, and any interpretive material herein has been published previously. The information was collected by the U.S. Geological Survey as part of its Regional Aquifer Systems Analysis (RASA) program, to aid in the effective management of the region's important ground-water resources by providing information about the geohydrology and geochemistry of the aquifer system (Vaccaro, 1986a). Other interpretive reports produced from this study are listed in the section Selected References.

PRESENTATION OF DATA

The report consists of three volumes: volume I, geohydrology; volume II, water levels; and volume III, ground-water quality. This volume presents water levels for selected wells in the Columbia Plateau regional aquifer system area for the period July 1982 through September 1985. The water-level information in this volume is sorted by county. The counties are arranged alphabetically, and wells within a county are listed in local number sequence (township/range/section; see table 1, at end of report).

Figure 1.--Location of study area.

WELL-NUMBERING SYSTEM

Wells in Washington and Oregon are identified according to their location in the rectangular system used for the subdivision of public lands. The identification consists of the township number, north or south of the Willamette base line; the range number, east or west of the Willamette meridian; and the section number, numbered consecutively beginning with '1' in the northeast corner of the township-range, and progressing sinusoidally to '36' in the southeast corner.

In Washington, a section is further divided into sixteen 40-acre tracts called quarter-quarter sections. These 40-acre tracts are lettered consecutively (except for 'I' and 'O'), beginning with 'A' in the northeast corner of the section and progressing sinusoidally to 'R' in the southeast corner. Within each quarter-quarter section, each well is assigned a unique two-digit serial number (fig. 2a).

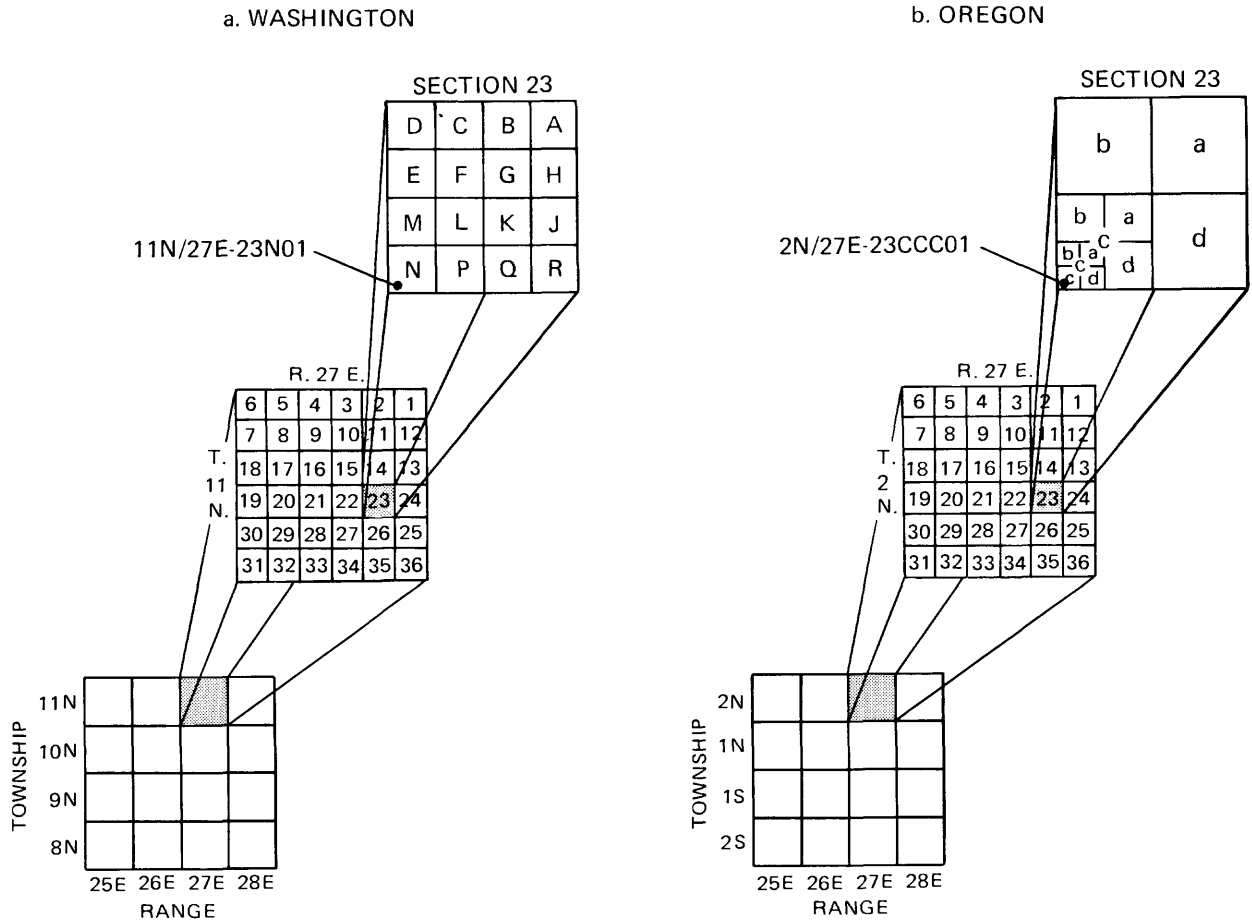

Figure 2.--Well-numbering system.

In Oregon, a section is divided into sixty-four 10-acre tracts by first dividing the section into four 160-acre quarter sections, lettered consecutively 'a' through 'd,' starting in the northeast corner and progressing counterclockwise. Each 160-acre quarter section is then divided into four 40-acre quarter-quarter sections lettered 'a' through 'd' in the same manner as for the quarter sections. Each quarter-quarter section is further divided into four 10-acre tracts or quarter-quarter-quarter sections, lettered 'a' through 'd' in the same manner used for the quarter and quarter-quarter sections. Where two or more wells are in the same 10-acre tract, a unique two-digit serial number is assigned to each well (fig. 2b).

For both States, the letter 'D' and a one-digit sequence number have been added following the serial number to indicate that a well has been deepened.

ACKNOWLEDGMENTS

The cooperation of the well owners, tenants, and well drillers who supplied information and allowed access to wells is gratefully acknowledged. Special thanks are extended to the U.S. Bureau of Reclamation and to the State of Washington Department of Ecology for collecting and supplying additional water-level data for this project.

Table 1.--Water levels for selected wells in the Columbia Plateau RASA project area

EXPLANATION

An asterisk (*) denotes missing or incomplete data.

LOCAL NUMBER: Location of well in the rectangular system used for the subdivision of public lands as explained in figure 2.

WATER LEVEL: Water levels in feet below or above (+) land surface datum.
 An asterisk (*) indicates site was visited on date shown, but no water level was measured due to reason shown by status code.
 Water-level date with day 00 indicates that only month and year of measurement were recorded.

METHOD (M) of Measurement

Code	Method	Accuracy
A	Airline	± 1 foot
B	Analog	± 1 foot
C	Calibrated airline	± 1 foot
E	Estimated	Unknown
G	Pressure gage	± 1 foot
H	Calibrated pressure gage	± 1 foot
L	Geophysical log	± 1 foot
M	Manometer	± 1 foot
N	Nonrecording gage	± 1 foot
R	Reported	Unknown
S	Steel tape	± 0.01 foot
T	Electrical tape	± 0.1 foot
V	Calibrated electrical tape	± 0.05 foot
Z	Other	Unknown

STATUS (S):

- D Dry (no water level was recorded).
- E Recently flowing.
- F Flowing, but the head could not be measured (no water level was recorded).
- G Nearby site that taps the same aquifer was flowing.
- H Nearby site that taps the same aquifer was flowing recently.
- I Injector site (recharge water being injected into the aquifer).
- J Injector site monitor (a nearby site that taps the same aquifer is injecting recharge water).
- N Measurement discontinued.
- O An obstruction was encountered in the well above the water surface (no water level was recorded).
- P Site was pumping.
- R Site had been pumping recently.
- S Nearby site that taps the same aquifer was being pumped.
- T Nearby site that taps the same aquifer had been pumped recently.
- V Foreign substance present on the surface of the water.
- W Well destroyed.
- X Water level affected by stage in nearby surface-water site.
- Z Other conditions that affect the measured water level.
