INTRODUCTION

With increasing use of computers in the earth sciences, the U.S. Geological Survey has been developing computer programs on many subjects in the fields of geology, hydrology, mapping, and image processing (figs. 1 and 2). Approximately 500 USGS publications between 1965 and 1989 contain computer programs either in hard copy form, or more recently, on microcomputer diskettes. Many of the computer programs have been released as formal and informal USGS publications including Professional Papers, Bulletins, Water-Supply Papers, Circulars, Techniques of Water-Resources Investigations Reports, and Open-File Reports. This report is a listing of citations of USGS publications through August 1989 containing computer programs, and supersedes Open-File Report 86-172 (Dodd and Sakss, 1986).

The citations are arranged in numerical order within each USGS publication series. Comments following the citations inform the user of revisions or supersessions and the diskette size if one is available. Following the list of citations are indexes for authors, computer program acronyms, and subjects. In constructing the subject index, report titles that were not descriptive were consulted. Most computer programs are in hard copy form; some of the more recent microcomputer programs can be obtained on diskette.

This report was compiled from several sources, including the previous listing (Open-File Report 86-172) and the American Geological Institute's CD-ROM, PUBLICATIONS OF THE U.S. GEOLOGICAL SURVEY. Publications released in 1989 were collected from the monthly list, NEW PUBLICATIONS OF THE U.S. GEOLOGICAL SURVEY. Effort was made to include all available, but especially the most recent, USGS publications that contain computer programs. Other computer-related publications, such as those concerning data base operations, are not included in this list; data base materials are described in Circular 817, SCIENTIFIC AND TECHNICAL, SPATIAL, AND BIBLIOGRAPHIC DATA BASES OF THE U.S. GEOLOGICAL SURVEY, (U.S. Geological Survey, 1983), or can be accessed through the EARTH SCIENCES DATA DIRECTORY (for information contact Earth Science Data Directory Project Manager, U.S. Geological Survey, 801 National Center, Reston, Virginia 22092, telephone: (703) 648-7144, FTS 959-7144).

The USGS publications listed can be purchased prepaid from Books and Open-File Reports U.S. Geological Survey, Federal Center Box 25425, Denver, Colorado 80225 (Telephone: (303) 236-7476, FTS 776-7476). The price listed in each citation is for a single copy as of August 1989. In many cases, microfiche is also available. Programs that are only available through the National Technical Information Service (NTIS) can be ordered from NTIS, 5285 Port Royal Road, Springfield, Virginia 22161 (Telephone: (703) 487-4600).

Please direct all correspondence concerning this list including additions and corrections, to the U.S. Geological Survey, Geologic Inquiries Group, 907 National Center, Reston, Virginia 22092 (Telephone: (703) 648-4383, FTS 959-4383).
