EXPLANATION

- Areas having high mineral resource potential (H)
- Areas having moderate mineral resource potential (M)
- Areas having low mineral resource potential (L)

Level of certainty of assessment:
- Data only suggest level of potential
- Data give good indication of level of potential
- Data clearly define level of potential

Commodities:
- Ag: Silver
- Au: Gold
- Cu: Copper
- Mn: Manganese
- Pb: Lead
- U: Uranium
- V: Vanadium
- Zn: Zinc

Areas having moderate mineral resource potential (M):
- Mines, prospects, and adits:
  - Swansea mine
  - Copper Penny prospect
  - Mesa prospect
  - Unnamed adit

Geologic map units:
- Post detachment rocks
  - Alluvial deposits (Quaternary)
  - Talus deposits (Quaternary)
  - Sand and gravel (Quaternary)
- QTc: Conglomerate and sandstone (Miocene)
- Tm: Megacrust basalt (Miocene)
- Tb: Basalt (Miocene)
- Tc: Conglomerate and sandstone (Miocene)
