ISOSTATIC GRAVITY MAP OF YELLOWSTONE PARK AND VICINITY
WYOMING, MONTANA, AND IDAHO

By

S.F. Carle, J.M. Glen, V.E. Langenheim, R.B. Smith, and H.W. Oliver

1990

EXPLANATION

Gravity anomaly contours. Contour interval 2 mGal. Hachures indicate gravity low. Contours were computer generated based on a 900-meter grid derived from scattered gravity data. Although the data have been edited, caution should be exercised when interpreting anomalies controlled by only a single gravity station.

A Gravity station collected by USGS, July 1987.
+ Gravity station collected by University of Utah.
x Gravity station collected by others.

National Park boundary.

This report is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards and with the North American Stratigraphic Code. Any use of trade, product, or firm names is for descriptive purposes only and does not imply endorsement by the U.S. Government.
